

## **Integrated Care Fellowship**

### **GENERAL DESCRIPTION:**

Under the supervision of the Nursing Supervisor, provides a range of health care services, within the scope of the profession's practice to individuals who are served by Shiawassee Health & Wellness and Behavioral Health Home benefit (BHH) with primary severe, persistent mental illness, developmental disabilities, and/or serious emotional disturbances and co-occurring complex medical conditions. A team approach is utilized to ensure integration between physical and mental health needs with a focus on managing chronic disease and an emphasis on promotion of preventative care and self-management health care strategies. Promotes mental health recovery, wellness, and full participation within the community for individuals in a manner where practice is trauma informed, co-occurring capable, person/family centered and integrated with other health care providers.

### **QUALIFICATIONS:**

Some coursework towards a degree in nursing or closely related field

Good communication skills, verbal and written

Desire to work with the vulnerable individuals in our community who experience mental illness and/or developmental disabilities.

### **ESSENTIAL FUNCTIONS:**

1. Researches, develops and provides education to individuals served and guardians about medication, chronic conditions, health and wellness related issues individually or in a group setting.
2. Assesses individuals served to determine their eligibility for BHH program or additional services.
3. Researches, develops and provides material regarding integrated healthcare to SHW staff, individuals served and their guardians.
4. Supports BHH team with developing and monitoring goals, objectives and implementation plans for services that relate to improving individuals served overall health, independence in self-care and ability to meet health care needs in their community.
5. Supports RN with reviewing results of lab tests, monitors electronic health record dashboard for past due laboratory testing and works with individuals served and primary service provider to complete; Alerts psychiatrist and primary health care provider to abnormal results. Provides patient centered education on results as necessary.
6. Researching community resources and providing support with access and connection to resources to individuals served.
7. Identify and reduce barriers for individuals served to increase access to care and supports.
8. Providing additional support to psychiatry department and/or BHH as needed.
